PHARMACEUTICAL DEVIATION INVESTIGATION REPORT
Document ID: DEV-2026-0881
Site: Vertex API Manufacturing Facility 2
Date: 2026-10-22
Batch Number: BZ-2026-881
Product: Benztropine Mesylate API
Process Step: Vacuum Tray Drying (Dryer VTD-03)
Severity: Major

DEVIATION DESCRIPTION:
During final quality release testing, Batch BZ-2026-881 exhibited residual Acetone of 0.72% w/w by gas chromatography, excee

PROCESS OBSERVATIONS:
Drying was scheduled for 16 hours at 45C under 15 mbar vacuum in Dryer VTD-03. At hour 09:15, cooling water recirculator va

POTENTIAL CONTRIBUTING FACTORS:
1. Equipment: Chilled water valve CV-102 actuator diaphragm fatigue.
2. Method: Absence of automatic audible interlock when condenser temperature exceeds 15C.
3. Measurement: Thermocouple TT-09 on lower shelf showed sluggish response during temperature ramp.

RECOMMENDED IMMEDIATE ACTION:
Quarantine Batch BZ-2026-881 in warehouse secure holding area.
